I was also a Teaching Assistant for an Operating Systems course.
- ▶ Worked as a Research Associate at Indian Institute of Management-Udaipur in project entitled *"Impact of Algorithmic Trading on Capital Market Microstructure"* from January, 2015 to August, 2015. As first step we simulated Indian Limit Order Book dynamics. The aim of the project was to construct a framework that captures the dynamics of limit order book in the Indian stock markets modeled on the set of previous historical data.
- ▶ Worked as a Junior Research Fellow at the Agro Climate Research Centre, Tamil Nadu Agricultural University, India, on the DST-GOI research project entitled *"Climate Change: Assessing impacts and developing Adaptation Strategies for Agriculture in Tamil Nadu"* from February, 2012 to June, 2013. I applied my programming skill using, FORTRAN/Perl and Shell Scripting for extracting the climate change scenarios (Base line Period: 1980-2000, Mid Century: 2021-2050 and End Century: 2080-2100) generated in the ECHAM climate model (Atmospheric General Circulation Model) for Tamil Nadu.

Project work

- NexusLinguarum is to promote synergies across Europe between linguists, computer scientists, terminologists, and other stakeholders in industry and society, in order to investigate and extend the area of linguistic data science (2021-)
- Translators without Borders-ADAPT Collaborative Project (2021)
- IRC Cardamom Consolidator Laureate (2020-) The Cardamom project aims to close the resource gap for minority and under-resourced languages by means of deep-learning-based natural language processing (NLP) and exploiting similarities of closely-related languages. The project further extends this idea to historical languages, which can be considered as closely related to their modern form, and as such aims to provide NLP through both space and time for languages that have been ignored by current approaches.
